### **PROGRAMME OBJECTIVE**

This course starts with the introduction to object-oriented concepts, terminology, and syntax, and the steps required to create basic Java programs. Faculty will learn the concepts of Java programming, design object-oriented applications with Java and create Java programs. This course culminates with a project that challenges faculty to design, implement, and demonstrate a Java based solution for a business or organization problem.

### **TARGET AUDIENCE**

College/university faculty who teach computer Science, information technology, or a related subject can attend.

### **AGENDA:**

Faculty will attend a 5 day training which will cover topics of Java Fundamentals and Programming. The curriculum and resources are available online and along with the theoretical concepts, teachers will also get hands-on experience in project development. The faculty will complete a group project on an application and on successful completion of the course project including online test, they will become certified as **“Oracle Academy Instructor”**, which means they can then take this course back to their students.
